Smd capacitor code pdf file software full

1 Write the first two digits of the capacitance. Older capacitors are less predictable, but almost all modern examples use the cÃ ³ I say is an EIA standard when the capacitor is too small to write the capacitance in its entirety. To begin, write down the first two digits, then decide what to do next³ based ³ your ³: [8] If your ³ starts with exactly two digits followed by a letter (for example, 44m), the first two digits are the full capacitance ³. Jump to find units. If one of the first two characters is a letter, skip to the letter systems. If the first three characters are all numbers, continue to the next step. 2 Use the third digit as a zero multiplier. The ³ three-digit capacitance code works as follows: if the third digit is 0 to 6, add many zeros to the end of the number. (For example, 453 Aë à ³ 45 x 103 Aë à ³ 45,000.) If the third digit is 8, multiply by 0.01. (e.g. 278 Aë à ³ à ²7 x 0.01 Aë à ³ à 0.27) If the third digit is 9, multiply by 0.1. (e.g. 309 Aë à ³ ³0 x 0.1 Aë à ³ à 3.0) 3 Build the capacitance units from the context. Smaller capacitors (made of ceramic, peñA cula or tantalum) use Picofarads (PF) units, equal to 10-12 Farads. Larger capacitors (the single aluminum electrolyte type or the double layer type) use microfarad units (UF or Aë pF), equal to 10-6 farads. [9] A capacitor can override this by adding a unit afterwards (P for Picofarad, N for nanofarad, or u for microfarad). However, if there is only one letter after the ³, this is usually the ³ of tolerance, not unity. (P and N are ³ rare tolerance codes, but they exist.) 4 CÃ ³ reading codes containing letters instead. If your ³ code includes a letter as one of the first two characters, there are three possibilities: if the card is an R, replace it with a decimal to obtain the capacitance in PF. For example, 4R1 means a capacitance of 4.1p. [10] If the card is P, N or u, this tells you the units (Pico, Nano- or Microfarad). Replace this letter with a decimal point. For example, N61 means ³71[-]CC ed serodasnednoc arap olos sodad serolav(amixiÃm n³Aisnet al arap senumoc sogid³Ac setneugis sol ed onu nazilitu serodasnednoc sol ed a³Royam al orep ,atelpmoc atsil anu renetbo arap AIE ed ejatlov ed albat al ratlusnoc edeuP .n³Aisnet ed sogid³Ac raterpretnI 7]61[.%51±ÃÃ ed n³Aicairav anu atneserper ,senumoc siÃm solobmÃs sol ed onu ,R .%28-/º0.22+ = V ,osicerp sonem le atsah ,%0.1±ÃÃ = A ,osicerp siÃm le edsed av ognar etsE .arutarepmet ed ognar etse ne aicnaticapac al ne n³Aicairav al artseum olobmÃs recret IE .C³A521 = 7 ,C³A501 = 6 ,C³A58 = 5 ,C³A56 = 4 ,C³A54 = 2 .amixiÃm arutarepmet al artseum olobmÃs odnuges IE .C³A55- = X ,C³A03- = Y ,C³A01 = Z .aminÃm arutarepmet al artseum olobmÃs remirp IE]51[-eugis omoc otse eterpretnI .odallated siÃm solobmÃs sert ed ametsis nu noc aicnarelot al natneserper serodasnednoc ed sopit sohcuM .artel-orem³An-artel aicnarelot ed serolav sol aelL 6)]41[.elbisop oiranecese roep led atart es euq agnopus ,adaremune aicnarelot anuginiv ev on iS(%02- / %08+ = Z ,%02 ±ÃÃ = M ,%01 ±ÃÃ = K ,%5 ±ÃÃ = J ,)abirra rev(%2 o Fp 2 = G ,)roiretna D le euq ametsis omsim le(%1 ±ÃÃ o Fp 1 ±ÃÃ = F ,Fp 01 a roirepus n³Aicacifisalc anu noc serodasnednoc arap %5,0 ±ÃÃ o ,Fp 01 a roirefni n³Aicacifisalc anu noc serodasnednoc arap Fp 5,0 ±ÃÃ = D ,Fp 52,0 ±ÃÃ = C ,Fp 1,0 ±ÃÃ = B]31[-arenam etneugis al ed ogid³Ac etse aczudart ,otitricic us ne etnatropmi se n³Aisicerp al iS ,rodasnednoc led odacidni rolav led ©Atse rodasnednoc led laer rolav le euq rarepse edeuq es euq acrec ol acifingis euq ol ,rodasnednoc led aicnarelot al atneserper artel atsE .sotig³Ad sert ed aicnaticapac ed rolav led ©Aupsed etnemataidemi artel anu omoc aicnarelot ed rolav le raremune neleus ,senip sod noc "seuqeuqnap" soz³Aeuqep res neleus euq ,socimi³Arec serodasnednoc solL ,socimi³Arec serodasnednoc ne aicnarelot ed ogid³Ac le ael5]21[.etnemroiretna ehircsed es omoc aicnaticapac al acidni el 352 y ,ejatlov le acidni el A1 ,sogid³Ac sod dadilaer ne se "352A1" omoc ogid³Ac nu]11[.Fu 2,5 acifingis 2u5 y Fn = 6.3V 1A = 10V 1C = 16V 1E = 25V 1H = 50V 2A = 100V 2D = 200V 2E = 250V ³ one letter codes are abbreviations of one of the above common values.
